

IEC/TR 62140-3 Ed. 1.0 en:2002, Fossil-fired steam power stations - Part 3: Steam-temperature control

application of this report is restricted to temperature control systems in power stations in which superheated steam is controlled at a desired target temperature using steam side control interventions, such as spray coolers or heat exchangers, or flue gas side control interventions such as flue gas reflux. This title may contain less than 24 pages of technical content.
