

Sell Yourself Right (How to get a job, make more money, and succeed in every aspect of your career with lightening fast results Book 1)

How would you like for major companies in your city, state, or country to be in line begging you to come work for them regardless of whether or not you have any formal job experience? So much of what we do and how we live is tied to our occupations. For better or worse, our jobs are where we spend the majority of our lives. So why not make it for better by getting a job or position at a place where you enjoy, and at a salary you love? Imagine a company with only one product; a marketing campaign with one focus: to get more interest in that one product than the company can handle. YOU are that product, and Sell Yourself Right is that company dedicated to teaching you how to get more companies chasing you than you can work for. Whatever your intentions are, Sell Yourself Right is a book that will teach you to achieve them by using the principles of professional marketing. If you're just out of college, looking to land your first real job, Sell Yourself Right will position you to leave the pack of fresh out of college in the dust... If you're already an entry-level employee at your dream company, this book will help you rise through the ranks more quickly, more effectively and more responsibly than ever before. If you already have a job but are looking to switch companies, positions or even industries, this book will help you draw the attention of top companies willing and ready to pay top dollar for your services. When you sell yourself right, the right jobs, projects and business opportunities will chase you instead of you chasing them. When you sell yourself right the right way, individuals and institutions literally bid to have you work for them.
