

Surviving Day by Day - Still They Come

In the beginning the infection started. It rushed across the nation like a tidal wave. Few survived the initial outbreak. Those that did were ill prepared for what was to come. Little did some of these people know how strong they were deep down inside. This is a story of such individuals. Beth a member of the C.D.C; Charlie, a simple handyman; Ceara, a simple young farm girl along with her new found friend Maximus a German Shepard; Tabitha, the typical southern rebel girl; and Colt, the meek and mild husband whose wife had died of the disease. These few people would escape to the woods, and somehow come together as a group. They came from all walks of life, and from various backgrounds. Trying to escape the insanity of massive death, they each arrived in a small National Park in Southern Missouri. One by one they stumbled onto the only person who could possibly help them Survive Day by Day. Alden, a retired U.S. Army 1st Sergeant with years of combat experience behind him, a trained military dog, and a pure and simple dont mess with me attitude. Taking them in one by one, he taught them the simplest rules of survival. Number one was to always work as a team. The civilians soon learned that the only way to stay alive was to develop the will to kill the undead, and sometimes the living. As time went on, they ran into others who had survived. Some had decided that it was a take what you want world now, and they were out only for themselves, damn the rest. Others were like their small group, just trying to keep alive and keep surviving Day by Day. They realized that to keep living they would have to start moving and look for safer places to live. An area that would not have had a large population even before the world turned. Alden knew of such place in New Mexico, so the group began to push west in search of others who like them were trying to carry on. Constantly searching for food and supplies was not an

easy task. There was the risk of death at every turn. It seemed as they traveled there would be no safe place. Death and destruction littered the world. Finally, they arrived at Aldens old army buddies place, outside of Ft. Sumner, New Mexico. They finally thought they had a home, where they could feel safe. A place where they could try to start anew, but this was not to be. The battles with the dead, though not as often, still occurred. One member they had picked up along the way had died along with a faithful friend, Maximus. The story continues as they pick up the broken pieces of the group, trying to hold onto the belief that someday, somewhere, things will get back to normal, if they could only hold out and Survive Day By Day.
