

## Waiting For My Eyes To Adjust

Two teen-aged boys set out one morning to explore the beach in their west coast town after a long rainy spell. As their adventures unfold, they encounter various critters and varmints along the way. Their encounters progress until they reach the railroad tracks that run alongside the beach.

There they are forced to learn the most important lesson they will ever learn. What they see and how they must deal with it gives them insight into the diversity of human nature and forces them to make an immediate decision regarding the value of life.
