

Current California Clinical Laboratory Laws

An essential reference of current California clinical laboratory laws, including new laws taking effect in January, 2013. This book provides an easily accessible, comprehensive, single source of current law for lab directors, lab managers, hospital compliance officers, and lab supervisors. Updated periodically to keep abreast of changes in California statutes and regulations affecting clinical laboratories. While California clinical lab laws are primarily found in the California Business and Professions Code and Title 17 of the California Code of Regulations, this book also contains current and newly enacted laws that the authors feel may be of interest to clinical laboratories that are found in other codes as well.
