

# Quintessential Cities, Accountable to the Future: Sustainability, Innovation and Citizenship

? ?This book can be seen as the third part of an unofficial trilogy on Sustainable Cities of the Future with the authors' previous books *Sustainable Development, Energy and the City* and *Sustainable Cities for the third millennium: The Odyssey of urban excellence*, both prefaced by Prof. Sir Peter Hall. All three books follow the evolving forefront of innovations towards Sustainable Cities. They collectively try to respond to the questions: What future cities wish to build (with their scarcities and capacities) on a finite planet? What do they do to achieve this? How do they contribute to redesign the world? The third book adopts, first and foremost, a strategic foresight approach including a scan of the future trends, tensions and risks in a more uncertain world, the possible and preferable futures, emerging policy issues, such as intergenerational cities or cities welcoming the immigrants and their impact on sustainable development, the Rio+20 prospects and the effects of the protracted crisis, efforts by world interconnected cities, including a case-study on Bangkok, a laboratory of urban change, and examples of frugal and resilient urban policies.?
