

Intellectual Property Theory and Practice: A Critical Examination of Chinas TRIPS Compliance and Beyond

This book explains Chinas intellectual property perspective in the context of European theories, through a critical examination of intellectual property theory and practice focused on Chinas compliance with the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). The authors critical review of contemporary intellectual property philosophy suggests that justifying intellectual property protection through Locke or Hegels property theories internalizes a theoretical paradox. Professor Wenwei Guans treatment of intellectual property law and practice in the PRC offers new perspectives that enrich an already active field of study . . . This book will be a useful contribution to academic and policy discourses examining conceptual and operational dimensions of Chinas intellectual property protection system and the broader process of Chinas international engagement. Dr. Pitman B. Potter, Professor of Law, University of British Columbia, Canada Dr. Guan reminds us of the daunting challenge of the public-private divide in forming and reforming TRIPS regime; how this regime has failed to address development needs and public concerns in developing countries like China; and how TRIPSs birth defect can be overcome and its evolution can be put back on the right track. Dr. Yahong Li, Associate Professor at Faculty of Law, Hong Kong University
