

Oecd Economic Outlook: June 2007 (Oecd Economic Outlook)

This issue of OECDs twice-yearly OECD Economic Outlook provides analysis of recent economic developments and economic projections for OECD and major non-OECD countries through the end of 2008. Its comprehensive statistical annex is a useful reference tool for international economic comparisons. Two special reports are included: one covers the effects of globalisation and how to maximise its benefits and minimise its adjustment costs. The second covers fiscal consolidation.
