

Oculoplastic Surgery Atlas

Written by top oculoplastic surgeons in the field, including Frank A. Nesi, MD. The texts distinguished authors have perfected the most frequently performed oculoplastic surgical techniques. Their atlas series is designed to instruct all ophthalmologists who wish to learn these techniques and thus enhance their income. This volume covers the latest in cosmetic facial surgery techniques including endoscopic foreheadplasty, direct eyebrow lift, rhytidectomy surgery, mid-face lift and facial cosmetic Botox. The study of the supporting anatomy, followed by clear cut guidelines with heavily illustrated techniques, offers a format which will allow the learner to gain the necessary understanding for achieving a more favorable result.
