

2 Billion Years Ago, A Heavily Armed Warship Went Into Earth Orbit

2 Billion Years Ago, A Heavily Armed Warship Went Into Earth Orbit On that fateful day over two billion years ago, a fast closing super class meteor was seconds away from sealing our planets history. Although we can not go back in time, the technology brought to Earth in that encounter, would one day let us reclaim our past. We are descendants of a civilization located halfway across the Milky Way Galaxy. An amazing discovery found in the ancient rocks of the Sudbury Basin reveals, Earth is a protected colony. The heavily armed warship (named Vision) left Earth in 35 AD. to return to Terra, his home world. Vision is returning to Earth in 2012, along with three other warships. Their mission is hopefully peaceful, but most ancient Earth civilizations and oracles predict the world will end in that year. It seems the judgment day that religions predict is upon us. However, we may only have to look to the outer fringes of our solar system for mercy, because that is where, we will find paradise. This book is an exciting and riveting history of what they built and what they left for us. The Roswell Incident, The Birth & Crucification of Christ, The Star of Bethlehem, Do Aliens Walk Among Us, A Grave Warning For 2012, and a History Lesson like no other. ---Plus--- Jurassica, a Planet Where Our Dinosaurs Live On. ---Immortality--- An Earth Toddler is Resurrected Earth, a sister planet that gave us a new beginning. The Terran Space Agency Sweet memories of a time gone by. Thunder and Lightning
