

# Perspectives on Kurdistans Economy and Society in Transition

The second scientific World Kurdish Congress was held in October 2012 at Hewler with the theme of improving the quality of life, science and culture for progress in Kurdistan. The papers presented focused on various important aspects of culture, economy, education, health, industry and political science in Kurdistan. The objective of this conference was to create a network of academicians to exchange and develop knowledge and work together with the Kurdistan Regional Government on how to further enhance the progress within the Kurdish society. This volume is a collection of 26 studies presented at the Congress and includes an introduction by the editors and a summary report of the Congress. The topics presented here are diverse, covering several areas pertinent to the current Kurdish situation. The studies are divided into ten areas: namely, agriculture and rural development; diaspora; education and research; health and quality of life; industry; information technology and e-government; infrastructure and development; language; human rights; and politics. In the last part of the volume, the organization committee provides a compilation of recommendations from the Congress to the Kurdistan Regional Government.
